Summary

A passionate Software Engineer with a Bachelor of Science in Applied Computer Science from Daystar University. Well-versed in JavaScript, React, Next.js, Flutter, and full-stack application development. Experienced in building scalable web and mobile applications, system optimization, and data analysis.

Professional history

May 2025 – January 2026 : Full Stack Developer Intern – Jumuisha Software Company Limited

- Tafa Wallet (Flutter Financial System) : Contributed to development of a mobile-based school financial management system used to manage student transactions, fee tracking, and institutional financial records. Implemented responsive UI screens, transaction flows, and optimized state management to ensure smooth performance and usability.
- Kodi Listing (React, Tailwind CSS, Next.js, Node.js) : Designed and developed a full-stack real estate web application from scratch. Built reusable components, implemented API integrations, handled routing and backend logic using Next.js, and optimized performance for scalability and responsiveness.
- Version Control & Collaboration : Utilized Git for version control and collaborated with designers and backend teams to deliver structured, production-ready applications.

August 2025 : Data Analyst (1 Month Contract) – Cordaid Kenya (Contracted through Jumuisha)

- Data Analysis & Reporting : Summarized and analyzed large datasets using advanced Excel techniques including pivot tables, cross-referencing, and structured data validation.
- Data Cleaning & Accuracy Validation : Improved data consistency by identifying discrepancies and ensuring accurate cross-dataset comparisons.
- Stakeholder Reporting Support : Assisted in preparing analytical summaries for organizational reporting and review.

January 2024 – April 2025 : Part-time Work Study – IT Support – Daystar University

- Technical Support & Troubleshooting : Provided IT support across university offices and classrooms, diagnosing and resolving hardware, software, and network connectivity issues.
- Network Setup & Configuration : Installed and configured internet connections, routers, and local network systems across multiple departments.
- System Maintenance : Maintained computer lab systems and ensured operational efficiency of institutional IT infrastructure.
- User Support & Training : Assisted students and staff with system-related issues, improving

digital accessibility and minimizing downtime.

Education

- AWS cloud practitioner certification — Ongoing
- Moringa School – March 2023 – November 2023:
Software Engineering (completed)
- Daystar University — September 2022 – February 2025:
BSc. Applied Computer Science (GPA-3.1)
- Chewoyet Boys' High School — 2018 – 2022:
KCSE (Grade B+ (78 points))

Skills

Languages

- Proficient in HTML, CSS, JavaScript, Typescript, C++, Java
- Skilled in Frameworks and libraries like React, React Native, NodeJS, Express, Tailwind CSS, Styled Components
- Knowledge in CI/CD, Distributed Systems, Docker, Kubernetes, and AWS

Software

- Databases: MongoDB, Firebase
- Platforms: Linux, Microsoft Windows 11, Docker, Git ,Slack
- AI Development & Coding Tools
